REASONS FOR ALLOWANCE

6. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of ***claims 1-35*** is the recitation in claim 1 of a fuel cell comprising a breaking guide that is used for breakage of at least one of the separators. The prior art references of record do not teach or suggest a breaking guide in combination with fuel cell separators.

The primary reason for the allowance of ***claims 38-52*** is the recitation in claim 38 of a disassembly method of disassembling a fuel cell which comprises a breaking guide that is used for breakage of at least one of the separators, the disassembly method comprising the step of utilizing the breaking guide to apply an external force from outside of the fuel cell to an outer face of at least one of the separators or the gap between the pair of separators, so as to facilitate disassembly of the fuel cell. The prior art references of record do not teach or suggest a disassembly method comprising a breaking guide in combination with separators to disassemble the fuel cell.

Art Unit: 1795

The primary reason for the allowance of *claim 53* is the recitation therein of wherein a disassembly-facilitating step inserts a cutting tool from outside of the fuel cell into the gap between the pair of separators, so as to apply external force.

The primary reason for the allowance for the allowance of *claim 54* is the recitation therein of wherein the disassembly-facilitating step cuts the sealing member arranged in the gap between the pair of separators with a cutting tool.

The primary reference of record do not teach or suggest a disassembly method comprising a cutting tool in combination with separators to disassembly a fuel cell.

The primary reason for the allowance of *claims 55-59* is the recitation in claim 55 of wherein the disassembly-facilitating step clamps the pair of separators to apply a pressure and successively shifts a pressing position to give warpage of the separators in directions away from each other. The prior art references of record do not teach or suggest a disassembly method comprising clamps in combination with separators to apply a pressure and successively shifts a pressing position to give warpage of the separators in directions away from each other.

The primary reason for the allowance *claims 60-87* is the recitation in claim 60 of a separator comprising a breaking guide that is formed along periphery of the separator for breakage of the separator. The prior art references of record do not teach or suggest a breaking guide in combination with fuel cell separators.

Art Unit: 1795

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
